so that...	
I can know what times to come in and buy myself some Almond Torte cake.	
I can order one for my son's birthday next week	
so that I can optimize my time and make my visit as fast as possible.	
I can buy something to surprise my girlfriend.	
I can compare it to other bakery and ultimately pick a cake for my wedding.	
I don't have to deal with my maps app on my phone.	
I can call in and order an Almond Torte for the office party I am throwing next Friday	
I can make the best decision on what I want to order	
I can find it with ease.	
so that I can determine if I want to buy one eventually.
